900790 Artist Acrylic Mediums - Gloss Medium 8 Oz. Jar	Liquitex Medium and Varnish - Gloss, 8 oz bottle, Gloss Medium. Liquitex Gloss Medium is also known as "Gloss Medium Varnish." Use it as a non-removable final picture varnish where a glossy protective coat is desired, or as a painting and glazing medium. It enhances the depth of color intensity, increases transparency and gloss, eases the flow of paint, and adds flexibility and adhesion to the paint film. Translucent when wet, and transparent when dry, this 100% acrylic polymer varnish is water-soluble when wet and can be thinned. Use it as an extender, a fixative, a ground, or a varnish. 900800 Artist Acrylic Mediums - Matte Medium	Liquitex Acrylic Medium - Matte, 16 oz bottle, Matte Medium. Mix medium viscosity Matte Medium with acrylic colors for completely matte, dull and flat effects and a non-reflecting finish. When mixed with acrylic paint, it extends color, increases transparency, matte and film integrity, eases paint flow, and adds to the flexibility and adhesion of paint film. It is opaque when wet and translucent when dry. Use it as an extender, a fixative, or a ground. Mix with Gloss Medium for a semi-gloss or satin medium. 900810 Artist Acrylic Mediums - Gel Medium	Liquitex Gel Medium - Gloss, 16 oz jar, Gel Medium, Gloss. A high viscosity medium, it dries to a crystal clear gloss finish for sparkling, transparent impastos and textured glazes. Translucent when wet, it is transparent to translucent when dry depending on the thickness of the application. An ideal paint extender, it increases the brilliance and transparency of color without changing paint thickness, resulting in paint similar in color depth to oil paint. Use it as an extender, a ground, or as the binder for powdered pigments to make an inexpensive "student grade" high viscosity thick gloss paint.
